

Surface® Connect to USB-C Charging Cable

Surface Connect Male to USB-C Male, 15 V / 3 A, 1.8 m (6 ft), No Data Transmission, Black

SKU: 353632 | EAN-13: 0766623353632 | UPC: 766623353632

Microsoft® Surface® Cable - Charge your Surface device via USB-C

The Manhattan Surface Connect to USB-C Charging Cable offers a more convenient way to charge your Surface. It converts the proprietary Microsoft Surface Connect port to the universal USB Type-C plug. In turn, you can replace the heavy, bulky power supply of your Surface Pro, Surface Book, Surface Laptop or Surface Go with a much more compact, versatile charging solution. The cable will also help keep things light while you travel since it lets you charge your Surface with the same USB-C Power Delivery (PD) wall charger you use to power up your smartphone. And if your Surface needs an urgent battery boost from a USB-C PD powerbank, its USB-C connector lets you get one.

Please note: A 15-V charger is required to use this cable. Surface Pro, Laptop and Book models require 45 W PD (15 V / 3 A) or greater. Surface Go models require 30 W PD (15 V / 2 A) or 45 W PD (15 V / 3 A). For best performance, always use 45 W or 60 W USB-C PD charger, available from Manhattan.

Features:

- Charges your Microsoft® Surface® Pro, Surface Book, Surface Laptop or Surface Go from a USB-C PD wall charger or powerbank
- Replaces the heavy, bulky Microsoft Surface power supply with a more compact, versatile charging solution
- Supports USB Power Delivery (PD); requires an external PD charger with at least 45 W (15 V / 3 A) – available from Manhattan
- Supports the Surface Connect port's overload, over-current and short-circuit protection
- Corrosion-resistant contacts
- Does not support data transmission
- Lifetime warranty

Specifications:

Standards and Certifications
• CE
• RoHS
• FCC

Package Contents
• Surface Connect to USB-C Charging Cable

NOTE: this cable requires a 15-V charger; check your current charger to ensure 15 V is listed.
Power source requirements:
1) Check your Microsoft® Surface for charging requirements.
2) Check your Microsoft Surface charger's output and voltage.
3) Check your USB-C PD power supply's output and voltage.

This cable charges with power up to 15 V / 3 A (45 W).
Power Delivery (PD) at 15 V is required for the USB-C power supply.

As a reference, check your original charger's power output.
If your original Surface charger is 36 W or 44 W, you will need a 45 W PD (15 V / 3 A) power source.

You may experience insufficient power if your USB-C power source is not greater than or equal to your original charger.
