USB Type-C Male to RJ45 Male Adapter Cable, USB 3.0 (USB 3.2 Gen 1) with 5 Gbps, Cat6 LAN with 10/100/1000 Mbps, FTP, Braided Jacket, Aluminum Boot, Black/Silver

SKU: 394826 | EAN-13: 0766623394826 | UPC: 766623394826

USB to Ethernet Cable for a Stable Wired Internet Connection for Your Laptop, MacBook or Tablet without a Separate Adapter

The Manhattan USB Type-C to RJ45 Network Cable is your solution for USB-C devices that lack built-in Ethernet ports. Without the need for an adapter, it connects directly to a router or switch. Unlike Wi-Fi, which can be affected by interference, distance, and obstacles, this wired RJ45 Ethernet connection offers consistent and reliable internet speeds, which is particularly important for activities like video conferencing, online gaming, and streaming, where stability is crucial.

High-Speed Data Transfer

The cable supports Gigabit (1000 Mbps) Ethernet speeds, allowing for fast downloads, uploads, and smooth data streaming, making it ideal for users who need high bandwidth for work or entertainment.

Plug-and-Play Convenience

The plug-and-play installation makes it effortless to set up, supporting multiple operating systems, including Windows, macOS, Linux, Chrome OS, iPadOS, and Android.

Superior Shielding and Durability

Built with FTP overall aluminum foil shielding, the cable reduces EMI and other interference sources, ensuring stable performance. The braided, tangle-resistant jacket offers durability and flexibility, while the sturdy aluminum boot provides superior strain relief, giving you a long-lasting, dependable connection solution for all your networking needs.

Enhanced Security

A wired connection is generally more secure than Wi-Fi, as it is less vulnerable to hacking or interference. This makes the USB-C to Ethernet cable a great choice for those who prioritize a secure connection.

Features:

- Provides a fast, reliable, and secure wired internet connection for USB-C devices without Ethernet port
- High-speed data transfer up to 1000 Mbps for faster downloads, smooth media streaming, and lag-free gaming
- Plug-and-play installation; Windows®, macOS®, Linux®, Chrome OS™, iPadOS®, and Android™ compatible
- Compatible with laptops and tablets from major brands such as HP®, Apple® MacBook® Pro / Air, iPad® Pro, Lenovo®, Asus®, Acer®, Dell®, and more
- Compatible with USB4® and Thunderbolt™ 3 / 4 interfaces
- FTP with overall aluminum foil shielding to reduce EMI and other interference sources
- Braided, tangle-resistant jacket with heavy-duty strain relief

- Sturdy aluminum boot for superior durability
- Standard 8P8C design, compatible with all network RJ45 connections
- Three-year warranty

Specifications:

Standards and Certifications

- CE
- RoHS
- REACH
- FCC
- UKCA

General

- Supported transfer speeds: up to 1 Gbps
- Category: Cat6
- Max. operating frequency: 250 MHz
- Shielding: aluminum foil (F/UTP)
- Wire: 100% pure bare copper (Cu)
- Jacket: braided nylon
- Boot: aluminum with strain relief
- 26 AWG
- Length: 2 m (7 ft.)
- Outer diameter (OD): 5.6 mm (0.22 in.)
- Net weight: 78 g (0.17 lbs.)
- Gross weight: 97 g (0.21 lbs.)

Connections

- One USB-C 24-pin, male
- One RJ45, male

Environmental

- Operating temperature: 0 - 45°C (32 - 113°F)
- Storage temperature: -10 - 70°C (14 - 158°F)
- Operating humidity (non-condensing): 10 - 90% RH

System Requirements

- Windows 7/8.1/10/11, Chrome OS, macOS, Linux, iPadOS or Android

Package Contents

- USB-C to Gigabit Ethernet Network Cable, 2 m (7 ft.)
