Laptop / Projector Presentation Cart - Put presenters in control with a sturdy, mobile and adjustable cart

The Manhattan Cart for Projectors and Notebooks is an adjustable presentation cart that gives you flexibility and support as you speak in public, present at meetings, teach and more. You can stay mobile with all the necessary pieces of electronic content delivery, using one of its trays to hold a projector and the other to hold your laptop/notebook. This comes in handy if it's not possible to mount the projector or permanently install a lectern. Each cart tray supports up to 10 kg (22 lbs.) to accommodate most equipment. This cart adapts to your needs. Both trays let you position the laptop and projector right where you want them. The upper tray offers 360° swivel and height adjustability from 850 to 1100 mm (33.5 to 43.3 in.). The lower tray tilts from -35 to 35° and offers height adjustability from 700 to 950 mm (27.6 to 37.4 in.). Its high-quality steel construction makes it sturdy, and durable casters let you wheel the cart to where you need it. Secure it in place by locking two of its wheels. Its adaptability and stability help you gain confidence during speeches, presentations or trainings in conference rooms, schools, universities, hotels and more. This mobile cart is easy to assemble and includes built-in, tool-free thumbscrews for safe, convenient tilt and height-adjustment.

Features:

- Adjustable cart/trolley with two trays for projectors and notebooks up to 10 kg (22 lbs.) each
- Up to 360° swivel and -35 to 35° tilt each for optimized views
