The manhattan® ADVANTAGE

30 Years of Market Experience

Founded in 1987, Manhattan was one of the first European-owned cable companies in Taiwan.

ISO 9001:2015 Certified

You can count on service and performance in accordance with ISO 9001:2015.

Global Expertise, Global Mentality

With offices in North America, Europe and Asia, we're keen on international market needs and can swiftly overcome challenges on a global scale.

Strength In Connectivity

Our versatile cables and adapters simplify complex connections for any interface, so consumers get the most out of their devices each day.

Guaranteed Quality

Our In-house quality-control teams test each product before it's shipped to personally ensure the excellence that is synonymous with the Manhattan brand.

Superior Warranty

Because we're dedicated to excellent quality, we offer 3-year warranties for all products with circuit boards and lifetime warranties for all others.

Dedicated Account Managers

Our account managers make sure to get to know your business and provide solutions for your benefit. We have the industry expertise and product familiarity for you to buy with confidence.

Digital Convenience

We provide a sophisticated CSV file and a digital version of this catalog to comfortably import our content into your webshop.

Asia Direct Volume Shipments

Get 15 - 25% additional gross margin with purchasing directly from Asia. We mitigate the risks and show you the keys to effective importing.

Payment Terms for Qualified Customers

Optimize your cash flow by benefitting from our products and services while getting payment flexibility. We are glad to examine the payment terms you are eligible for together with you.

OUR STATE-OF-THE-ART HDMI CABLES

High-Definition Multimedia Interface (HDMI) has become the standard interface for most home audio/video systems and is a common interface for business applications. These digital cables simultaneously transfer uncompressed video and both compressed and uncompressed audio from a digital source. They connect devices like Blu-ray players, game consoles or laptops to digital displays like monitors, projectors or TVs.

WIth HDMI Ethernet Channel

The Manhattan HDMI cable's built-in Ethernet Channel

allows for sharing an Internet connection among multiple devices — no need for separate network cables. On top of Ultra HD video (4K), it also delivers high-quality audio thanks to the built-in Audio Return Channel.

What are CL3-RATED HDMI Cables
& Why Should You USE Them?

Manhattan CL3 HDMI cables are made to securely send a 300-volt signal to compatible media equipment. Because their advanced construction prevents shocks or arcs and minimizes potential fire risks, they are ideal for in-wall installations.

Digital Visual Interface (DVI) is the successor to the VGA cable. This video display cable has three different connection names in five different configurations. The first and least common, DVI-A, is an analog-only signal. The second is DVI-D, which has two distinct digital configurations: single link, which supports video resolutions up to 1920x120@60Hz, and dual link, which supports video resolution up to 2560x1600@60Hz. The third connection is DVI-I, which supports both analog and digital signals,and it offers the same two configurations as DVI-D (single link or dual link)

Video Graphics Array/Super Video Graphics Array (VGA/SVGA) iformats are also referred to as D-Sub and DB15, with the difference in the shielding and gauge of the cables. The SVGA cable provides better signal quality over longer distances. At one time, these cables were the standard for video connection between computers and monitors or displays. Today, these analog cables have become less common as manufacturers incorporate newer, digital standards into their devices.

Display Hubs with MST From manhattan®
Life just got easier.™

What is MST?

Multi-Stream Transport (MST) is a feature that pushes content streams from a port on a DisplayPort device to multiple screens. The MST function can also create a video wall*, where one video signal is cast onto several screens acting as one large screen.

Requires a graphics card that supports video-wall function.

Example:

Mini DisplayPort to 4-Port DisplayPort Splitter Hub with MST
Model Number: 207744
Duplicates an Ultra high-definition digital audio/video signal for 4 DP outputs

4K Resolution | Audio/Video | Video Wall | USB Powered

What is USB POWER DELIVERY?

Ultrafast

Ultrapowerful

Smart & Secure

Universal & Convenient

USB Power Delivery (USB-PD) is a technology that uses USB-C cables to make fast-charging of mobile devices more efficient than ever before. Here are the benefits:

Ultrafast

In 30 minutes, a regular 5W charger can get an empty battery of an iPhone 11 Pro or Google Pixel 4 to only ~20%. Modern smartphones like these fully profit from USB-PD and support charging with 18W which boosts the battery to ~50% in the same time.

Ultrapowerful

USB-PD does not stop at smartphones. With a maximum output of 100W, this technology is powerful enough to even charge notebooks and power-hungry tablets like the iPad Pro 12.9" quickly.

Smart & Secure

With USB-PD, the cable, charger and device communicate with each other before any power starts flowing. That guarantees the safest charging with protection against overloading, over-current, overheating and short-circuits

Universal & Convenient

USB-PD is an open standard, so every manufacturer can adopt it. That makes it universal and allows you to charge such different devices as an HP laptop, a Nintendo Switch or an Apple Macbook Pro with one and the same compact charger.

What is USB 3.2 GEN 1 AND GEN 2?

USB 3.2 Gen 1 is also called SuperSpeed USB. The spec transmits data at up to 5 Gbps (0.625 GB/s). Power can be supplied at up to 5 volts and 1.5 amps (7.5 watts). USB 3.2 Gen 1 cannot supply power while it transmits data.

USB 3.2 Gen 2 is also known as SuperSpeed+. It can transmit data at up to 10 Gbps (1.25 GB/s). Power is supplied at up to 20 volts and five amps (100 watts). USB 3.2 Gen 2 can supply power and transmit data at the same time.

New Name	Old Name	Original Name	SuperSpeed Name	Max. Speed
USB 3.2 Gen 1	USB 3.1 Gen 1	USB 3.0	SuperSpeed USB	5 Gbps
USB 3.2 Gen 2	USB 3.1 Gen 2	USB 3.1	SuperSpeed USB 10Gbps	10 Gbps
USB 3.2 Gen 2x2	N/A	USB 3.2	SuperSpeed USB 20Gbps	20 Gbps

Our Smallest Power Delivery Charger
Pocket-friendly, yet powerful

GaN Tech Power Delivery
Wall Charger - 65 W
[102278]
Ultra-compact GaN Technology, USB-C Power Delivery (PD) Port up to 65 W, Foldable US and Interchangeable UK / EU Plugs

Profit from all Power Delivery benefits, but in an extra-small format, thanks to **GaN (Galium Nitride)!**

With only 51 x 51 x 28 mm, this charger is smaller than many stock phone chargers and only weighs 160 g.

Gallium nitride chips are more efficient than traditional silicon chips. Their components are smaller, lighter and emit less heat for a more compact, cooler and safer charger

Despite its tiny format, this charger is powerful enough to charge a MacBook Pro 13" completely in only 2.1 hours

A foldable US plug and interchangeable EU and UK plugs in the package contents make this charger the perfect international travel companion

Serial AT Attachment (SATA) is a computer bus interface that connects PCs to storage devices like Optical Drives, Hard Disk Drives (HDD) and Solid State Drives (SSD). SATA replaced the complex and limited IDE interface with a faster, more capable standard. SATA cables are available in two varieties–data and power. The 7-pin data cables can either be internal (SATA) or external (eSATA), and generally, both perform the same functions. The SATA standard also includes a power cord and looks similar to the data cable, but it is larger and features 15 pins.

Power Cable is a general cable category which has many different standards such as AC power, SATA or USB.However, they are all used for internal or external applications
